

## Plant Simulation – Training by means of examples

You can also put together an individual training program from the examples that can be found on my website at [http://www.bangsow.de/suche\\_kategorie\\_en.php?kategorie=7](http://www.bangsow.de/suche_kategorie_en.php?kategorie=7) each example has a unique training ID. The majority of examples has a training duration of one hour with a combination of a few basics.

## Course Content

You define the content of the training course yourself. Make an inquiry by noting the training ID of the examples you are interested in. I will promptly put together an offer on this basis.

The screenshot shows the website header with the logo and navigation menu. The main content area displays a search for "Training-ID: # 539" with a date of "04.01.2013". Below the search results, there are icons for "init", "Shiftcalendar", and "output\_per\_week=400", "cyclotime=10:30.0000". A red circle highlights the training ID #539.

Of course, it is also possible to create special examples based on your scope of work and use these in a special training course.

All the content will be conveyed based on examples from your production processes. Participants should have gained some initial experience with Plant Simulation and SimTalk. The training course is based on the following book:

Manufacturing Simulation with Plant Simulation and SimTalk (Springer, 2009, ISBN-13: 978-3642050732).

### User Level:

Starter

### Duration:

variable

### Costs:

On Request\*

### Training location:

On site in your company.

\* The price does not depend on the number of course participants and includes all travel expenses.
